About This eBook

The Master Key To Riches!
Jim Phillips (Ageless)

Some men seem to attract success, power, wealth, attainment, with very little conscious effort; others conquer with great difficulty; still others fail altogether to reach their ambitions, desires and ideals.

Why is this so?

Why should some men realize their ambitions easily, others with difficulty, and still others not at all?

The cause cannot be physical, else the most perfect men, physically, would be the most successful. The difference, therefore, must be mental - must be in the mind; hence mind must be the creative force, must constitute the sole difference between men. It is mind, therefore, which overcomes environment and every other obstacle in the path of men.

When the creative power of thought is fully understood, its effect will be seen to be marvelous. But such results cannot be secured without proper application, diligence, and concentration.

The student will find that the laws governing in the mental and spiritual world are as fixed and infallible as in the material world. To secure the desired results, then, it is necessary to know the law and to comply with it.

A proper compliance with the law will be found to produce the desired result with invariable exactitude. The student who learns that power comes from within, that he is weak only because he has depended on help from outside, and who unhesitatingly throws himself on his own thought, instantly rights himself, stands erect, assumes a dominant attitude, and works miracles.

It is evident, therefore, that he who fails to fully investigate and take advantage of the wonderful progress which is being made in this last and greatest science, will soon be as far behind as the man who would refuse to acknowledge and accept the benefits which have accrued to mankind through an understanding of the laws of electricity.

Of course, mind creates negative conditions just as readily as favorable conditions, and when we consciously or unconsciously visualize every kind of lack, limitation and discord, we create these conditions; this is what many are unconsciously doing all the time.

This law as well as every other law is no respecter of persons, but is in constant operation and is relentlessly bringing to each individual exactly what he has created; in other words, "Whatsoever a man soweth that shall he also reap."

Abundance, therefore, depends upon a recognition of the laws of Abundance, and the fact that Mind is not only the creator, but the only creator of all there is.

Certainly nothing can be created, before we know that it can be created and then make the proper effort. There is no more Electricity in the world today than there was fifty years ago, but until someone recognized the law by which it could be made of service, we received no benefit; now that the law is understood, practically the whole world is lit by it.

So with the law of Abundance; it is only those who recognize the law and place themselves in harmony with it, who share in its benefits.

The scientific spirit now dominates every field of effort, relations of cause and effect are no longer ignored.

The discovery of a region of law marked an epoch in human progress. It eliminated the element of uncertainty and caprice in men's lives, and substituted law, reason and certitude.

Men now understand that for every result there is an adequate and definite cause, so that when a given result is desired, they seek the condition by which alone this result may be attained.

The basis upon which all law rests was discovered by inductive reasoning which consists of comparing a number of separate instances with one another until the common factor which gives rise to them all is seen.

It is this method of study to which the civilized nations owe the greater part of their prosperity and the more valuable part of their knowledge; it has lengthened life, it has mitigated pain, it has spanned rivers, it has brightened the night with the splendor of day, extended the range of vision, accelerated motion, annihilated distance, facilitated intercourse, and enabled men to descend into the sea, and into the air. What wonder then that men soon endeavored to extend the blessings of this system of study to their method of thinking, so that when it became plainly evident that certain results followed a particular method of thinking it only remained to classify these results.

This method is scientific, and it is the only method by which we shall be permitted to retain that degree of liberty and freedom which we have been accustomed to look upon as an inalienable right, because a people is safe at home and in the world only if national preparedness mean such things as growing surplus of health, accumulated efficiency in public and private business of whatever sort, continuous advance in the science and art of acting together, and the increasingly dominant endeavor to make all of these and all other aspects of national development center and revolve about ascending life, single and collective, for which science, art and ethics furnish guidance and controlling motives.

"The Master Key To Riches" is based on absolute scientific truth and will unfold the possibilities that lie dormant in the individual, and teach how they may be brought into powerful action, to increase the person's effective capacity, bringing added energy, discernment, vigor and mental elasticity. The student who gains an understanding of the mental laws which are unfolded will come into the possession of an ability to secure results hitherto undreamed of, and which has rewards hardly to be expressed in words.

It explains the correct use of both the receptive and active elements of the mental nature, and instructs the student in the recognition of opportunity; it strengthens the will and reasoning powers, and teaches the cultivation and best uses of imagination, desire, the emotions and the intuitional faculty. It gives initiative, tenacity of purpose, wisdom of choice, intelligent sympathy and a thorough enjoyment of life on its higher planes.

"The Master Key To Riches" teaches the use of Mind Power, true Mind Power, not any of the substitutes and perversions; it has nothing to do with Hypnotism, Magic or any of the more or less fascinating deceptions by which many are led to think that something can be had for nothing.

"The Master Key To Riches" cultivates and develops the understanding which will enable you to control the body and thereby the health. It improves and strengthens the Memory. It develops Insight, the kind of Insight which is so rare, the kind which is the distinguishing characteristic of every successful business man, the kind which enables men to see the possibilities as well as the difficulties in every situation, the kind which enables men to discern opportunity close at hand, for thousands fail to see opportunities almost within their grasp while they are industriously working with situations which under no possibility can be made to realize any substantial return.

"The Master Key To Riches" develops Mental Power which means that others instinctively recognize that you are a person of force, of character - that they want to do what you want them to do; it means that you attract men and things to you; that you are what some people call "lucky", that "things" come you way' that you have come into an understanding of the fundamental laws of Nature, and

have put yourself in harmony with them; that you are in tune with Infinite; that you understand the law of attraction, the Natural laws of growth, and the Psychological laws on which all advantages in the social and business world rest.

Mental Power is creative power, it gives you the ability to create for yourself; it does not mean the ability to take something away from someone else. Nature never does things that way. Nature makes two blades for grass grow where one grew before, and Mind Power enables men to do the same thing.

"The Master Key To Riches" develops insight and sagacity, increased independence, the ability and disposition to be helpful.

It destroys distrust, depression, fear, melancholia, and every form of lack limitation and weakness, including pain and disease; it awakens buried talents, supplies initiative, force, energy, vitality - it awakens an appreciation of the beautiful in Art, Literature and Science.

It has changed the lives of thousands of men and women, by substituting definite principles for uncertain and hazy methods - and principles for the foundation upon which every system of efficiency must rest.

Elbert Gary, the chairman of the United States Steel Corporation, said "The services of advisors, instructors, efficiency experts in successful management are indispensable to most business enterprises of magnitude, but I deem the recognition and adoption of right principles vastly more importance."

"The Master Key To Riches" teaches right principles, and suggests methods for making a practical application of the principles; in that it differs from every other course of study. It teaches that the only possible value which can attach to any principle is in its application.

Many read books, take home study courses, attend lectures all their lives without ever making any progress in demonstrating the value of the principles involved.

"The Master Key To Riches" suggests methods by which the value of the principles taught may be demonstrated and put in actual practice in the daily experience.

There is a change in the thought of the world. This change is silently transpiring in our midst, and is more important than any which the world has undergone since the downfall of Paganism.

The present revolution in the opinions of all classes of men, the highest and most cultured of men as well as those of the laboring class, stands unparalleled in the history of the world.

Science has of late made such vast discoveries, has revealed such an infinity of resources, has unveiled such enormous possibilities and such unsuspected forces, that scientific men more and more hesitate to affirm certain theories as established and indubitable or to deny certain other theories as absurd or impossible, and so a new civilization is being born; customs, creeds, and cruelty are passing; vision, faith and service are taking their place. The fetters of tradition are being melted off from humanity, and as the dross of materialism is being consumed, thought is being liberated and truth is rising full orbed before an astonished multitude.

The whole world is on the eve of a new consciousness, a new power and a new realization of the resources within the self. The last century saw the most magnificent material progress in history. The present century will produce the greatest progress in mental and spiritual power.

Physical Science has resolved matter into molecules, molecules into atoms, atoms into energy, and it has remained for Sir Ambrose Fleming, in an address before the Royal Institution, to resolve this energy into mind. He says: "In its ultimate essence, energy may be incomprehensible by us except as an exhibition of the direct operation of that which we call Mind or Will."

Let us see what are the most powerful forces in Nature. In the mineral world everything is solid and fixed. In the animal and vegetable kingdom it is in a state of flux, forever changing, always being created and recreated. In the atmosphere we find heat, light and energy. Each realm becomes finer and more spiritual as we pass from the visible to the invisible, from the coarse to the fine, from the low potentiality to high potentiality. When we reach the invisible we find energy in its purest and most volatile state.

And as the most powerful forces of Nature are the invisible forces, so we find that the most powerful forces of man are his invisible forces, his spiritual force, and the only way in which the spiritual force can manifest is through the process of thinking. Thinking is the only activity which the spirit possesses, and thought is the only product of thinking.

Addition and subtraction are therefore spiritual transactions; reasoning is a spiritual process; ideas are spiritual conceptions; questions are spiritual searchlights and logic, argument and philosophy is spiritual machinery.

Every thought brings into action certain physical tissue, parts of the brain, nerve or muscle. This produces an actual physical change in the construction of the tissue. Therefore it is only necessary to have a certain number of thoughts on a given subject in order to bring about a complete change in the physical organization of a man.

This is the process by which failure is changed to success.

Thoughts of courage, power, inspiration, harmony, are substituted for thoughts of failure, despair, lack, limitation and discord, and as these thoughts take root, the physical tissue is changed and the individual sees life in a new light, old things have actually passed away, all things have become new, he is born again, this time born of the spirit, life has a new meaning for him, he is reconstructed and is filled with joy, confidence, hope, energy. He sees opportunities for success to which he was heretofore blind. He recognizes possibilities which before had no meaning for him.

The thoughts of success with which he has been impregnated are radiated to those around him, and they in turn help him onward and upward; he attract to him new and successful associates, and this in turn changes his environment; so that by this simple exercise of thought, a man changes not only himself, but his environment, circumstances and conditions.

You will see, you must see, that we are at the dawn of a new day; that the possibilities are so wonderful, so fascinating, so limitless as to be almost bewildering. A century ago any man with a Gatling Gun could have annihilated a whole army equipped with the implements of warfare then in use. So it is at present.

Any man with a knowledge of the possibilities contained in "The Master Key To Riches" has an inconceivable advantage over the multitude.

PART TWELVE - THE MASTER KEY TO RICHES

PART TWELVE

Part Twelve is enclosed herewith. In the fourth paragraph you will find the following statement: "You must first have the knowledge of your power; second, the courage to dare; third, the faith to do." If you concentrate upon the thoughts given, if you give them your entire attention, you will find a world of meaning in each sentence, and will attract to yourself other thoughts in harmony with them, and you will soon grasp the full significance of the vital knowledge upon which you are concentrating.

Knowledge does not apply itself; we as individuals must make the application, and the application consists in fertilizing the thought with a living purpose.

The time and thought which most persons waste in aimless effort would accomplish wonders if properly directed with some special object in view. In order to do this, it is necessary to center your mental force upon a specific thought and hold it there, to the exclusion of all other thoughts. If you have ever looked through the viewfinder of a camera, you found that when the object was not in focus, the impression was indistinct and possibly blurred, but when the proper focus was obtained the picture was clear and distinct. This illustrates the power of concentration. Unless you can concentrate upon the object which you have in view, you will have but a hazy, indifferent, vague, indistinct and blurred outline of your ideal and the results will be in accordance with your mental picture.

PART TWELVE

1. There is no purpose in life that cannot be best accomplished through a scientific understanding of the creative power of thought.
2. This power to think is common to all. Man is, because he thinks. Man's power to think is infinite, consequently his creative power is unlimited.
3. We know that thought is building for us the thing we think of and actually bringing it nearer, yet we find it difficult to banish fear, anxiety or discouragement, all of which are powerful thought forces, and which continually send the things we desire further away, so that it is often one step forward and two steps backward.
4. The only way to keep from going backward is to keep going forward. Eternal vigilance is the price of success. There are three steps, and each one is absolutely essential. You must first have the knowledge of your power; second, the courage to dare; third, the faith to do.
5. With this as a basis you can construct an ideal business, an ideal home, ideal friends, and an ideal environment. You are not restricted as to material or cost. Thought is omnipotent and has the power to draw on the Infinite bank of primary substance for all that it requires. Infinite resources are therefore at your command.
6. But your ideal must be sharp, clear-cut, definite; to have one ideal today, another tomorrow, and a third next week, means to scatter your forces and accomplish nothing; your result will be a meaningless and chaotic combination of wasted material.
7. Unfortunately this is the result which many are securing, and the cause is self evident. If a sculptor started out with a piece of marble and a chisel and changed his ideal every fifteen minutes, what result could he expect? And why should you expect any different result in molding the greatest and most plastic of all substances, the only real substance?
8. The result of this indecision and negative thought is often found in the loss of material wealth. Supposed independence which required many years of toil and effort suddenly disappears. It is often found then that money and property are not independence at all. On the contrary, the only independence is found to be a practical working knowledge of the creative power of thought.
9. This practical working method cannot come to you until you learn that the only real power which you can have is the power to adjust yourself to Divine and

unchangeable principles. You cannot change the Infinite, but you can come into an understanding of Natural laws. The reward of this understanding is a conscious realization of your ability to adjust your thought faculties with the Universal Thought which is Omnipresent. Your ability to cooperate with this Omnipotence will indicate the degree of success with which you meet.

10. The power of thought has many counterfeits which are more or less fascinating, but the results are harmful instead of helpful.

11. Of course, worry, fear, and all negative thoughts produce a crop after their kind; those who harbor thoughts of this kind must inevitably reap what they have sown.

12. Again, there are the Phenomena seekers who gormandize on the so-called proofs and demonstration obtained at materializing séances. They throw open their mental doors and soak themselves in the most poisonous currents which can be found in the psychic world. They do not seem to understand that it is the ability to become negative, receptive and passive, and thus drain themselves of all their vital force, which enables them to bring about these vibratory thought forms.

13. There are also the Hindu worshippers, who see in the materializing phenomena which are performed by the so-called adepts, a source of power, forgetting, or never seeming to realize that as soon as the will is withdrawn the forms wither, and the vibratory forces of which they are composed vanish.

14. Telepathy, or thought transference, has received considerable attention, but as it requires a negative mental state on the part of the receiver, the practice is harmful. A thought may be sent with the intention of hearing or seeing, but it will bring the penalty attached to the inversion of the principle involved.

15. In many instances, hypnotism is positively dangerous to the subject as well as the operator. No one familiar with the laws governing in the mental world would think of attempting to dominate the will of another, for by so doing, he will gradually (but surely) divest himself of his own power.

16. All of these perversions have their temporary satisfaction and for some a keen fascination, but there is an infinitely greater fascination in a true understanding of the world of power within, a power which increases with use; is permanent instead of fleeing; which not only is potent as a remedial agency to bring about the remedy for past error or results of wrong thinking, but is a prophylactic agency protecting us from all manner and form of danger, and finally is an actual creative force with which we can build new conditions and new environment.

17. The law is that thought will correlate with its object and bring forth in the material world the correspondence of the thing thought or produced in the mental world. We then discern the absolute necessity of seeing that every thought has the inherent germ of truth in order that the law of growth will bring into manifestation good, for good alone can confer any permanent power.

18. The principle which gives the thought the dynamic power to correlate with its object, and therefore to master every adverse human experience, is the law of attraction, which is another name for love. This is an eternal and fundamental principle, inherent in all things, in every system of Philosophy, in every Religion, and in every Science. There is no getting away from the law of love. It is feeling that imparts vitality to thought. Feeling is desire, and desire is love. Thought impregnated with love becomes invincible.

19. We find this truth emphasized wherever the power of thought is understood, The Universal Mind is not only Intelligence, but it is substance, and this substance is the attractive force which brings electrons together by the law of attraction so that they form atoms; the atoms in turn are brought together by the same law and form molecules; molecules take objective forms; and so we find that the law of love is the creative force behind every manifestation, not only of atoms, but of worlds, of the Universe, of everything of which the imagination can form any conception.

20. It is the operation of this marvelous law of attraction which has caused men in all ages and all times to believe that there must be some personal being who responded to their petitions and desires, and manipulated events in order to comply with their requirements.

21. It is the combination of Thought and Love which forms the irresistible force, called the law of attraction. All natural laws are irresistible, the law of Gravitation, or Electricity, or any other law operates with mathematical exactitude. There is no variation; it is only the channel of distribution which may be imperfect. If a bridge falls, we do not attribute the collapse to any variation of the law of gravitation. If a light fails us, we do not conclude that the laws governing electricity cannot be depended upon, and if the law of attraction seems to be imperfectly demonstrated by an inexperienced or uninformed person, we are not to conclude that the greatest and most infallible law upon which the entire system of creation depends has been suspended. We should rather conclude that a little more understanding of the law is required, for the same reason that a correct solution of a difficult problem in Mathematics is not always readily and easily obtained.

22. Things are created in the mental or spiritual world before they appear in the outward act or event. by the simple process of governing our thought forces today, we help create the events which will come into our lives in the future, perhaps even tomorrow. Educated desire is the most potent means of bringing into action the law of attraction.

23. Man is so constituted that he must first create the tools, or implements by which he gains the power to think. The mind cannot comprehend an entirely new idea until a corresponding vibratory brain cell has been prepared to receive it. This explains why it is so difficult for us to receive or appreciate an entirely new idea; we have no brain cell capable of receiving it; we are therefore incredulous; we do not believe it.

24. If, therefore, you have not been familiar with the Omnipotence of the law of attraction, and the scientific method by which it can be put into operation, or if you have not been familiar with the unlimited possibilities which it opens to those who are enabled to take advantage of the resources it offers, begin now and create the necessary brain cells which will enable you to comprehend the unlimited powers which may be yours by cooperating with Natural Law. This is done by concentration or attention.

25. The intention governs the attention. Power comes through repose. It is by concentration that deep thoughts, wise speech, and all forces of high potentiality are accomplished.

26. It is in the Silence that you get into touch with the Omnipotent power of the subconscious mind from which all power is evolved.

27. He who desires wisdom, power, or permanent success of any kind will find it only within; it is an unfoldment. The unthinking may conclude that the silence is very simple and easily attained, but it should be remembered that only in absolute silence may one come into contact with Divinity itself; may learn of the unchangeable law and open for himself the channels by which persistent practice and concentration lead to perfection.

28. This week go to the same room, take the same chair, the same position as previously; be sure to relax, let go, both mentally and physically; always do this; never try to do any mental work under pressure; see that there are no tense muscles or nerves, that you are entirely comfortable. Now realize your unity with omnipotence; get into touch with this power, come into a deep and vital understanding, appreciation, and realization of the fact that your ability to think is your ability to act upon the Universal Mind, and bring it into manifestation, realize that it will meet any and every requirement; that you have exactly the same potential ability which any individual ever did have or ever will have, because each is but an expression or manifestation of the One, all are parts of the whole, there is no difference in kind or quality, the only difference being one of degree.

"Thought cannot conceive of anything that may not be brought to expression. He who first uttered it may be only the suggester, but the doer will appear."

Wilson

Study Questions with Answers - Part Twelve

111. How may any purpose in life be best accomplished?

Through a scientific understanding of the spiritual nature of thought.

112. What three steps are absolutely essential?

The knowledge of our power, the courage to dare, the faith to do.

113. How is the practical working knowledge secured?

By an understanding of Natural laws.

114. What is the reward of an understanding of these laws?

A conscious realization of our ability to adjust ourselves to Divine and unchanging principle.

115. What will indicate the degree of success with which we meet?

The degree in which we realize that we cannot change the Infinite but must cooperate with it.

116. What is the principle which gives thought its dynamic power?

The Law of Attraction which rests on vibration, which in turn rests upon the law of love. Thought impregnated with love becomes invincible.

117. Why is this law irresistible?

Because it is a Natural law. All Natural laws are irresistible and unchangeable and act with mathematical exactitude. There is no deviation or variation.

118. Why then does it sometimes seem to be difficult to find the solution to our problems in life?

For the same reason that it is sometimes difficult to find the correct solution to a difficult mathematical problem. The operator is uninformed or inexperienced.

119. Why is it impossible for the mind to grasp an entirely new idea?

We have no corresponding vibratory brain cell capable of receiving the idea.

120. How is wisdom secured?

By concentration; it is an unfoldment; it comes from within.
