About This eBook

The Master Key To Riches!
Jim Phillips (Ageless)

Some men seem to attract success, power, wealth, attainment, with very little conscious effort; others conquer with great difficulty; still others fail altogether to reach their ambitions, desires and ideals.

Why is this so?

Why should some men realize their ambitions easily, others with difficulty, and still others not at all?

The cause cannot be physical, else the most perfect men, physically, would be the most successful. The difference, therefore, must be mental - must be in the mind; hence mind must be the creative force, must constitute the sole difference between men. It is mind, therefore, which overcomes environment and every other obstacle in the path of men.

When the creative power of thought is fully understood, its effect will be seen to be marvelous. But such results cannot be secured without proper application, diligence, and concentration.

The student will find that the laws governing in the mental and spiritual world are as fixed and infallible as in the material world. To secure the desired results, then, it is necessary to know the law and to comply with it.

A proper compliance with the law will be found to produce the desired result with invariable exactitude. The student who learns that power comes from within, that he is weak only because he has depended on help from outside, and who unhesitatingly throws himself on his own thought, instantly rights himself, stands erect, assumes a dominant attitude, and works miracles.

It is evident, therefore, that he who fails to fully investigate and take advantage of the wonderful progress which is being made in this last and greatest science, will soon be as far behind as the man who would refuse to acknowledge and accept the benefits which have accrued to mankind through an understanding of the laws of electricity.

Of course, mind creates negative conditions just as readily as favorable conditions, and when we consciously or unconsciously visualize every kind of lack, limitation and discord, we create these conditions; this is what many are unconsciously doing all the time.

This law as well as every other law is no respecter of persons, but is in constant operation and is relentlessly bringing to each individual exactly what he has created; in other words, "Whatsoever a man soweth that shall he also reap."

Abundance, therefore, depends upon a recognition of the laws of Abundance, and the fact that Mind is not only the creator, but the only creator of all there is.

Certainly nothing can be created, before we know that it can be created and then make the proper effort. There is no more Electricity in the world today than there was fifty years ago, but until someone recognized the law by which it could be made of service, we received no benefit; now that the law is understood, practically the whole world is lit by it.

So with the law of Abundance; it is only those who recognize the law and place themselves in harmony with it, who share in its benefits.

The scientific spirit now dominates every field of effort, relations of cause and effect are no longer ignored.

The discovery of a region of law marked an epoch in human progress. It eliminated the element of uncertainty and caprice in men's lives, and substituted law, reason and certitude.

Men now understand that for every result there is an adequate and definite cause, so that when a given result is desired, they seek the condition by which alone this result may be attained.

The basis upon which all law rests was discovered by inductive reasoning which consists of comparing a number of separate instances with one another until the common factor which gives rise to them all is seen.

It is this method of study to which the civilized nations owe the greater part of their prosperity and the more valuable part of their knowledge; it has lengthened life, it has mitigated pain, it has spanned rivers, it has brightened the night with the splendor of day, extended the range of vision, accelerated motion, annihilated distance, facilitated intercourse, and enabled men to descend into the sea, and into the air. What wonder then that men soon endeavored to extend the blessings of this system of study to their method of thinking, so that when it became plainly evident that certain results followed a particular method of thinking it only remained to classify these results.

This method is scientific, and it is the only method by which we shall be permitted to retain that degree of liberty and freedom which we have been accustomed to look upon as an inalienable right, because a people is safe at home and in the world only if national preparedness mean such things as growing surplus of health, accumulated efficiency in public and private business of whatever sort, continuous advance in the science and art of acting together, and the increasingly dominant endeavor to make all of these and all other aspects of national development center and revolve about ascending life, single and collective, for which science, art and ethics furnish guidance and controlling motives.

"The Master Key To Riches" is based on absolute scientific truth and will unfold the possibilities that lie dormant in the individual, and teach how they may be brought into powerful action, to increase the person's effective capacity, bringing added energy, discernment, vigor and mental elasticity. The student who gains an understanding of the mental laws which are unfolded will come into the possession of an ability to secure results hitherto undreamed of, and which has rewards hardly to be expressed in words.

It explains the correct use of both the receptive and active elements of the mental nature, and instructs the student in the recognition of opportunity; it strengthens the will and reasoning powers, and teaches the cultivation and best uses of imagination, desire, the emotions and the intuitional faculty. It gives initiative, tenacity of purpose, wisdom of choice, intelligent sympathy and a thorough enjoyment of life on its higher planes.

"The Master Key To Riches" teaches the use of Mind Power, true Mind Power, not any of the substitutes and perversions; it has nothing to do with Hypnotism, Magic or any of the more or less fascinating deceptions by which many are led to think that something can be had for nothing.

"The Master Key To Riches" cultivates and develops the understanding which will enable you to control the body and thereby the health. It improves and strengthens the Memory. It develops Insight, the kind of Insight which is so rare, the kind which is the distinguishing characteristic of every successful business man, the kind which enables men to see the possibilities as well as the difficulties in every situation, the kind which enables men to discern opportunity close at hand, for thousands fail to see opportunities almost within their grasp while they are industriously working with situations which under no possibility can be made to realize any substantial return.

"The Master Key To Riches" develops Mental Power which means that others instinctively recognize that you are a person of force, of character - that they want to do what you want them to do; it means that you attract men and things to you; that you are what some people call "lucky", that "things" come you way' that you have come into an understanding of the fundamental laws of Nature, and

have put yourself in harmony with them; that you are in tune with Infinite; that you understand the law of attraction, the Natural laws of growth, and the Psychological laws on which all advantages in the social and business world rest.

Mental Power is creative power, it gives you the ability to create for yourself; it does not mean the ability to take something away from someone else. Nature never does things that way. Nature makes two blades for grass grow where one grew before, and Mind Power enables men to do the same thing.

"The Master Key To Riches" develops insight and sagacity, increased independence, the ability and disposition to be helpful.

It destroys distrust, depression, fear, melancholia, and every form of lack limitation and weakness, including pain and disease; it awakens buried talents, supplies initiative, force, energy, vitality - it awakens an appreciation of the beautiful in Art, Literature and Science.

It has changed the lives of thousands of men and women, by substituting definite principles for uncertain and hazy methods - and principles for the foundation upon which every system of efficiency must rest.

Elbert Gary, the chairman of the United States Steel Corporation, said "The services of advisors, instructors, efficiency experts in successful management are indispensable to most business enterprises of magnitude, but I deem the recognition and adoption of right principles vastly more importance."

"The Master Key To Riches" teaches right principles, and suggests methods for making a practical application of the principles; in that it differs from every other course of study. It teaches that the only possible value which can attach to any principle is in its application.

Many read books, take home study courses, attend lectures all their lives without ever making any progress in demonstrating the value of the principles involved.

"The Master Key To Riches" suggests methods by which the value of the principles taught may be demonstrated and put in actual practice in the daily experience.

There is a change in the thought of the world. This change is silently transpiring in our midst, and is more important than any which the world has undergone since the downfall of Paganism.

The present revolution in the opinions of all classes of men, the highest and most cultured of men as well as those of the laboring class, stands unparalleled in the history of the world.

Science has of late made such vast discoveries, has revealed such an infinity of resources, has unveiled such enormous possibilities and such unsuspected forces, that scientific men more and more hesitate to affirm certain theories as established and indubitable or to deny certain other theories as absurd or impossible, and so a new civilization is being born; customs, creeds, and cruelty are passing; vision, faith and service are taking their place. The fetters of tradition are being melted off from humanity, and as the dross of materialism is being consumed, thought is being liberated and truth is rising full orbed before an astonished multitude.

The whole world is on the eve of a new consciousness, a new power and a new realization of the resources within the self. The last century saw the most magnificent material progress in history. The present century will produce the greatest progress in mental and spiritual power.

Physical Science has resolved matter into molecules, molecules into atoms, atoms into energy, and it has remained for Sir Ambrose Fleming, in an address before the Royal Institution, to resolve this energy into mind. He says: "In its ultimate essence, energy may be incomprehensible by us except as an exhibition of the direct operation of that which we call Mind or Will."

Let us see what are the most powerful forces in Nature. In the mineral world everything is solid and fixed. In the animal and vegetable kingdom it is in a state of flux, forever changing, always being created and recreated. In the atmosphere we find heat, light and energy. Each realm becomes finer and more spiritual as we pass from the visible to the invisible, from the coarse to the fine, from the low potentiality to high potentiality. When we reach the invisible we find energy in its purest and most volatile state.

And as the most powerful forces of Nature are the invisible forces, so we find that the most powerful forces of man are his invisible forces, his spiritual force, and the only way in which the spiritual force can manifest is through the process of thinking. Thinking is the only activity which the spirit possesses, and thought is the only product of thinking.

Addition and subtraction are therefore spiritual transactions; reasoning is a spiritual process; ideas are spiritual conceptions; questions are spiritual searchlights and logic, argument and philosophy is spiritual machinery.

Every thought brings into action certain physical tissue, parts of the brain, nerve or muscle. This produces an actual physical change in the construction of the tissue. Therefore it is only necessary to have a certain number of thoughts on a given subject in order to bring about a complete change in the physical organization of a man.

This is the process by which failure is changed to success.

Thoughts of courage, power, inspiration, harmony, are substituted for thoughts of failure, despair, lack, limitation and discord, and as these thoughts take root, the physical tissue is changed and the individual sees life in a new light, old things have actually passed away, all things have become new, he is born again, this time born of the spirit, life has a new meaning for him, he is reconstructed and is filled with joy, confidence, hope, energy. He sees opportunities for success to which he was heretofore blind. He recognizes possibilities which before had no meaning for him.

The thoughts of success with which he has been impregnated are radiated to those around him, and they in turn help him onward and upward; he attract to him new and successful associates, and this in turn changes his environment; so that by this simple exercise of thought, a man changes not only himself, but his environment, circumstances and conditions.

You will see, you must see, that we are at the dawn of a new day; that the possibilities are so wonderful, so fascinating, so limitless as to be almost bewildering. A century ago any man with a Gatling Gun could have annihilated a whole army equipped with the implements of warfare then in use. So it is at present.

Any man with a knowledge of the possibilities contained in "The Master Key To Riches" has an inconceivable advantage over the multitude.

PART FOURTEEN - THE MASTER KEY TO RICHES

PART FOURTEEN

You have found from your study thus far that thought is a spiritual activity and is therefore endowed with creative power. This does not mean that some thought is creative, but that all thought is creative. This same principle can be brought into operation in a negative way, through the process of denial.

The conscious and subconscious are but two phases of action in connection with one mind. The relation of the subconscious to the conscious is quite analogous to that existing between a weather vane and the atmosphere.

Just as the least pressure of the atmosphere causes an action on the part of the weather vane, so does the least thought entertained by the conscious mind produce within your subconscious mind action in exact proportion to the depth of feeling characterizing the thought and the intensity with which the thought is indulged.

It follows that if you deny unsatisfactory conditions, you are withdrawing the creative power of your thought from these conditions. You are cutting them away at the root. You are sapping their vitality.

Remember that the law of growth necessarily governs every manifestation in the objective, so that a denial of unsatisfactory conditions will not bring about instant change. A plant will remain visible for some time after its roots have been cut, but it will gradually fade away and eventually disappear, so the withdrawal of your thought from the contemplation of unsatisfactory conditions will gradually, but surely, terminate these conditions.

You will see that this is an exactly opposite course from the one which we would naturally be inclined to adopt.

It will therefore have an exactly opposite effect to the one usually secured. Most persons concentrate intently upon unsatisfactory conditions, thereby giving the condition that measure of energy and vitality which is necessary in order to supply a vigorous growth.

PART FOURTEEN

1. The Universal Energy in which all motion, light, heat, and color have their origin, does not partake of the limitation of the many effects of which it is the cause, but it is supreme over them all. This Universal Substance is the source of all Power, Wisdom and Intelligence.

2. To recognize this Intelligence is to acquaint yourself with the knowing quality of Mind and through it to move upon the Universal Substance, and bring it into harmonious relations in your affairs.

3. This is something that the most learned physical science teacher has not attempted -- a field of discovery upon which he has not yet launched; in fact, but few of the materialistic schools have ever caught the first ray of this light. It does not seem to have dawned upon them that wisdom is just as much present everywhere as are force and substance.

4. Some will say, if these principles are true, why are we not demonstrating them? As the fundamental principle is obviously correct, why do we not get proper results? We do. We get results in exact accordance with our understanding of the law and our ability to make the proper application. We secured no results from the laws governing electricity until someone formulated the law and showed us how to apply it.

5. This puts us in an entirely new relation to our environment, opening up possibilities previously undreamed of, and this by an orderly sequence of law which is naturally involved in our new mental attitude.

6. Mind is creative and the principle upon which this law is based is sound and legitimate and is inherent in the nature of things; but this creative power does not originate in the individual, but in the Universal, which is the source and fountain of all energy and substance, the individual is simply the channel for the distribution of this energy. The individual is the means by which the Universal produces the various combinations which result in the formation of phenomena.

7. We know that scientists have resolved matter into an immense number of molecules; these molecules have been resolved into atoms, and the atoms into electrons. The discovery of electrons in high vacuum glass tubes containing fused terminals of hard metal, indicates conclusively that these electrons fill all space; that they exist everywhere, that they are omnipresent. They fill all material bodies and occupy the whole of what we call empty space. This, then, is the Universal Substance from which all things proceed.

8. Electrons would forever remain electrons unless directed where to go to be assembled into atoms and molecules, and this director is Mind. A number of electrons revolving around a center of force constitutes an atom; atoms unite in absolutely regular mathematical ratios and form molecules, and these unite with each other to form a multitude of compounds which unite to build the Universe.

9. The lightest known atom is hydrogen and this is 1,700 times heavier than an electron. An atom of mercury is 300,000 times heavier than an electron. Electrons are pure negative electricity, and as they have the same potential velocity as all other cosmic energy, such as heat, light, electricity and thought, neither time nor space require consideration. The manner in which the velocity of light was ascertained is interesting.

10. The velocity of light was obtained by the Danish astronomer Roemer in 1676, by observing the eclipses of Jupiter's moons. When the earth was nearest to Jupiter, the eclipse appeared about eight and one-half minutes too soon for the calculations, and when the earth was most remote from Jupiter, they were about eight and one-half minutes too late. Roemer concluded the reason to be that it required 17 minutes for light from the planet to traverse the diameter of the earth's orbit, which measured the difference of the distances of the earth from Jupiter. This calculation has since been verified, and proves that light travels about 186,000 miles a second.

11. Electrons manifest in the body as cells, and possess mind and intelligence sufficient for them to perform their functions in the human physical anatomy. Every part of the body is composed of cells, some of which operate independently; others in communities. Some are busy building tissue, while others are engaged in forming the various secretions necessary for the body. Some act as carriers of material; others are the surgeons whose work it is to repair damage; others are scavengers, carrying off waste; others are constantly ready to repel invaders or other undesirable intruders of the germ family.

12. All these cells are moving for a common purpose and each one is not only a living organism, but has sufficient intelligence to enable it to perform its necessary duties. It is also endowed with sufficient intelligence to conserve the energies and perpetuate its own life. It must, therefore, secure sufficient nourishment and it has been found that it exercises choice in the selection of such nourishment.

13. Each cell is born, reproduces itself, dies and is absorbed. The maintenance of health and life itself depends upon the constant regeneration of these cells.

14. It is therefore apparent that there is mind in every atom of the body; this mind is negative mind, and the power of the individual to think makes him positive, so that he can control this negative mind. This is the scientific explanation for

metaphysical healing, and will enable anyone to understand the principle upon which this remarkable phenomenon rests.

15. This negative mind, which is contained in every cell of the body, has been called the subconscious mind, because it acts without our conscious knowledge. We have found that this subconscious mind is responsive to the will of the conscious mind.

16. All things have their origin in mind, and appearances are the result of thought. So that we see that things in themselves have no origin, permanency, or reality. Since they are produced by thought, they can be erased by thought.

17. In mental, as in natural science, experiments are being made and each discovery lifts man one step higher toward his possible goal. We find that every man is the reflection of the thought he has entertained during his lifetime. This is stamped on his face, his form, his character, his environment.

18. Back of every effect there is a cause, and if we follow the trail to its starting point, we shall find the creative principle out of which it grew. Proofs of this are now so complete that this truth is generally accepted.

19. The objective world is controlled by an unseen and, heretofore, unexplainable power. We have, heretofore, personalized this power and called it God. We have now, however, learned to look upon it as the permeating essence or Principle of all that exists -- the Infinite or Universal Mind.

20. The Universal Mind, being infinite and omnipotent, has unlimited resources at its command, and when we remember that it is also omnipresent, we cannot escape the conclusion that we must be an expression or manifestation of that Mind.

21. A recognition and understanding of the resources of the subconscious mind will indicate that the only difference between the subconscious and the Universal is one of degree. They differ only as a drop of water differs from the ocean. They are the same in kind and quality, the difference is one of degree only.

22. Do you, can you, appreciate the value of this all-important fact; do you realize that a recognition of this tremendous fact places you in touch with Omnipotence? The subconscious mind being the connecting link between the Universal Mind and the conscious mind, is it not evident that the conscious mind can consciously suggest thoughts which the subconscious mind will put into action, and as the subconscious is one with the Universal, is it not evident that no limit can be placed upon its activities?

23. A scientific understanding of this principle will explain the wonderful results which are secured through the power of prayer. The results which are secured in

this way are not brought about by any special dispensations of providence, but on the contrary, they are the result of the operation of a perfectly natural law. There is, therefore, nothing either religious or mysterious about it.

24. Yet there are many who are not ready to enter into the discipline necessary to think correctly, even though it is evident that wrong thinking has brought failure.

25. Thought is the only reality; conditions are but the outward manifestations; as the thought changes, all outward or material conditions must change in order to be in harmony with their creator, which is thought.

26. But the thought must be clear cut, steady, fixed, definite, unchangeable; you cannot take one step forward and two steps backward, neither can you spend twenty or thirty years of your life building up negative conditions as the result of negative thoughts, and then expect to see them all melt away as the result of fifteen or twenty minutes of right thinking.

27. If you enter into the discipline necessary to bring about a radical change in your life, you must do so deliberately, after giving the matter careful thought and full consideration, and then you must allow nothing to interfere with your decision.

28. This discipline, this change of thought, this mental attitude will not only bring you the material things which are necessary for your highest and best welfare, but will bring health and harmonious conditions generally.

29. If you wish harmonious conditions in your life, you must develop an harmonious mental attitude.

30. Your world without will be a reflection of your world within.

31. For your exercise this week, concentrate on Harmony, and when I say concentrate, I mean all that the word implies; concentrate so deeply, so earnestly, that you will be conscious of nothing but harmony. Remember, we learn by doing. Reading these lessons will get you nowhere. It is in the practical application that the value consists.

"Learn to keep the door shut, keep out of your mind and out of your world, every element that seeks admittance with no definite helpful end in view."

George Mathew Adams

Study Questions with Answers - Part Fourteen

131. What is the source of all Wisdom, Power and Intelligence?

The Universal Mind.

132. Where do all motion, light, heat and color have their origin?

In the Universal Energy, which is one manifestation of the Universal Mind.

133. Where does the creative power of thought originate?

In the Universal Mind.

134. What is thought?

Mind in motion.

135. How is the Universal differentiated in form?

The individual is the means by which the Universal produces the various combinations which result in formation of phenomena.

136. How is this accomplished?

The power of the individual to think is his ability to act upon the Universal and bring it into manifestation.

137. What is the first form which the Universal takes so far as we know?

Electrons, which fill all space.

138. Where do all things have their origin?

In mind.

139. *What is the result of a change of thought?*

A change in conditions.

140. *What is the result of a harmonious mental attitude?*

Harmonious conditions in life.

"Thought, immaterial though it may be, is the matrix that shapes the issues of life. The mind has been active in all fields during this fruitful century, but it is to science we must look for the thoughts that have shaped all thinking."
