About This eBook

The Master Key To Riches!
Jim Phillips (Ageless)

Some men seem to attract success, power, wealth, attainment, with very little conscious effort; others conquer with great difficulty; still others fail altogether to reach their ambitions, desires and ideals.

Why is this so?

Why should some men realize their ambitions easily, others with difficulty, and still others not at all?

The cause cannot be physical, else the most perfect men, physically, would be the most successful. The difference, therefore, must be mental - must be in the mind; hence mind must be the creative force, must constitute the sole difference between men. It is mind, therefore, which overcomes environment and every other obstacle in the path of men.

When the creative power of thought is fully understood, its effect will be seen to be marvelous. But such results cannot be secured without proper application, diligence, and concentration.

The student will find that the laws governing in the mental and spiritual world are as fixed and infallible as in the material world. To secure the desired results, then, it is necessary to know the law and to comply with it.

A proper compliance with the law will be found to produce the desired result with invariable exactitude. The student who learns that power comes from within, that he is weak only because he has depended on help from outside, and who unhesitatingly throws himself on his own thought, instantly rights himself, stands erect, assumes a dominant attitude, and works miracles.

It is evident, therefore, that he who fails to fully investigate and take advantage of the wonderful progress which is being made in this last and greatest science, will soon be as far behind as the man who would refuse to acknowledge and accept the benefits which have accrued to mankind through an understanding of the laws of electricity.

Of course, mind creates negative conditions just as readily as favorable conditions, and when we consciously or unconsciously visualize every kind of lack, limitation and discord, we create these conditions; this is what many are unconsciously doing all the time.

This law as well as every other law is no respecter of persons, but is in constant operation and is relentlessly bringing to each individual exactly what he has created; in other words, "Whatsoever a man soweth that shall he also reap."

Abundance, therefore, depends upon a recognition of the laws of Abundance, and the fact that Mind is not only the creator, but the only creator of all there is.

Certainly nothing can be created, before we know that it can be created and then make the proper effort. There is no more Electricity in the world today than there was fifty years ago, but until someone recognized the law by which it could be made of service, we received no benefit; now that the law is understood, practically the whole world is lit by it.

So with the law of Abundance; it is only those who recognize the law and place themselves in harmony with it, who share in its benefits.

The scientific spirit now dominates every field of effort, relations of cause and effect are no longer ignored.

The discovery of a region of law marked an epoch in human progress. It eliminated the element of uncertainty and caprice in men's lives, and substituted law, reason and certitude.

Men now understand that for every result there is an adequate and definite cause, so that when a given result is desired, they seek the condition by which alone this result may be attained.

The basis upon which all law rests was discovered by inductive reasoning which consists of comparing a number of separate instances with one another until the common factor which gives rise to them all is seen.

It is this method of study to which the civilized nations owe the greater part of their prosperity and the more valuable part of their knowledge; it has lengthened life, it has mitigated pain, it has spanned rivers, it has brightened the night with the splendor of day, extended the range of vision, accelerated motion, annihilated distance, facilitated intercourse, and enabled men to descend into the sea, and into the air. What wonder then that men soon endeavored to extend the blessings of this system of study to their method of thinking, so that when it became plainly evident that certain results followed a particular method of thinking it only remained to classify these results.

This method is scientific, and it is the only method by which we shall be permitted to retain that degree of liberty and freedom which we have been accustomed to look upon as an inalienable right, because a people is safe at home and in the world only if national preparedness mean such things as growing surplus of health, accumulated efficiency in public and private business of whatever sort, continuous advance in the science and art of acting together, and the increasingly dominant endeavor to make all of these and all other aspects of national development center and revolve about ascending life, single and collective, for which science, art and ethics furnish guidance and controlling motives.

"The Master Key To Riches" is based on absolute scientific truth and will unfold the possibilities that lie dormant in the individual, and teach how they may be brought into powerful action, to increase the person's effective capacity, bringing added energy, discernment, vigor and mental elasticity. The student who gains an understanding of the mental laws which are unfolded will come into the possession of an ability to secure results hitherto undreamed of, and which has rewards hardly to be expressed in words.

It explains the correct use of both the receptive and active elements of the mental nature, and instructs the student in the recognition of opportunity; it strengthens the will and reasoning powers, and teaches the cultivation and best uses of imagination, desire, the emotions and the intuitional faculty. It gives initiative, tenacity of purpose, wisdom of choice, intelligent sympathy and a thorough enjoyment of life on its higher planes.

"The Master Key To Riches" teaches the use of Mind Power, true Mind Power, not any of the substitutes and perversions; it has nothing to do with Hypnotism, Magic or any of the more or less fascinating deceptions by which many are led to think that something can be had for nothing.

"The Master Key To Riches" cultivates and develops the understanding which will enable you to control the body and thereby the health. It improves and strengthens the Memory. It develops Insight, the kind of Insight which is so rare, the kind which is the distinguishing characteristic of every successful business man, the kind which enables men to see the possibilities as well as the difficulties in every situation, the kind which enables men to discern opportunity close at hand, for thousands fail to see opportunities almost within their grasp while they are industriously working with situations which under no possibility can be made to realize any substantial return.

"The Master Key To Riches" develops Mental Power which means that others instinctively recognize that you are a person of force, of character - that they want to do what you want them to do; it means that you attract men and things to you; that you are what some people call "lucky", that "things" come you way' that you have come into an understanding of the fundamental laws of Nature, and

have put yourself in harmony with them; that you are in tune with Infinite; that you understand the law of attraction, the Natural laws of growth, and the Psychological laws on which all advantages in the social and business world rest.

Mental Power is creative power, it gives you the ability to create for yourself; it does not mean the ability to take something away from someone else. Nature never does things that way. Nature makes two blades for grass grow where one grew before, and Mind Power enables men to do the same thing.

"The Master Key To Riches" develops insight and sagacity, increased independence, the ability and disposition to be helpful.

It destroys distrust, depression, fear, melancholia, and every form of lack limitation and weakness, including pain and disease; it awakens buried talents, supplies initiative, force, energy, vitality - it awakens an appreciation of the beautiful in Art, Literature and Science.

It has changed the lives of thousands of men and women, by substituting definite principles for uncertain and hazy methods - and principles for the foundation upon which every system of efficiency must rest.

Elbert Gary, the chairman of the United States Steel Corporation, said "The services of advisors, instructors, efficiency experts in successful management are indispensable to most business enterprises of magnitude, but I deem the recognition and adoption of right principles vastly more importance."

"The Master Key To Riches" teaches right principles, and suggests methods for making a practical application of the principles; in that it differs from every other course of study. It teaches that the only possible value which can attach to any principle is in its application.

Many read books, take home study courses, attend lectures all their lives without ever making any progress in demonstrating the value of the principles involved.

"The Master Key To Riches" suggests methods by which the value of the principles taught may be demonstrated and put in actual practice in the daily experience.

There is a change in the thought of the world. This change is silently transpiring in our midst, and is more important than any which the world has undergone since the downfall of Paganism.

The present revolution in the opinions of all classes of men, the highest and most cultured of men as well as those of the laboring class, stands unparalleled in the history of the world.

Science has of late made such vast discoveries, has revealed such an infinity of resources, has unveiled such enormous possibilities and such unsuspected forces, that scientific men more and more hesitate to affirm certain theories as established and indubitable or to deny certain other theories as absurd or impossible, and so a new civilization is being born; customs, creeds, and cruelty are passing; vision, faith and service are taking their place. The fetters of tradition are being melted off from humanity, and as the dross of materialism is being consumed, thought is being liberated and truth is rising full orb'd before an astonished multitude.

The whole world is on the eve of a new consciousness, a new power and a new realization of the resources within the self. The last century saw the most magnificent material progress in history. The present century will produce the greatest progress in mental and spiritual power.

Physical Science has resolved matter into molecules, molecules into atoms, atoms into energy, and it has remained for Sir Ambrose Fleming, in an address before the Royal Institution, to resolve this energy into mind. He says: "In its ultimate essence, energy may be incomprehensible by us except as an exhibition of the direct operation of that which we call Mind or Will."

Let us see what are the most powerful forces in Nature. In the mineral world everything is solid and fixed. In the animal and vegetable kingdom it is in a state of flux, forever changing, always being created and recreated. In the atmosphere we find heat, light and energy. Each realm becomes finer and more spiritual as we pass from the visible to the invisible, from the coarse to the fine, from the low potentiality to high potentiality. When we reach the invisible we find energy in its purest and most volatile state.

And as the most powerful forces of Nature are the invisible forces, so we find that the most powerful forces of man are his invisible forces, his spiritual force, and the only way in which the spiritual force can manifest is through the process of thinking. Thinking is the only activity which the spirit possesses, and thought is the only product of thinking.

Addition and subtraction are therefore spiritual transactions; reasoning is a spiritual process; ideas are spiritual conceptions; questions are spiritual searchlights and logic, argument and philosophy is spiritual machinery.

Every thought brings into action certain physical tissue, parts of the brain, nerve or muscle. This produces an actual physical change in the construction of the tissue. Therefore it is only necessary to have a certain number of thoughts on a given subject in order to bring about a complete change in the physical organization of a man.

This is the process by which failure is changed to success.

Thoughts of courage, power, inspiration, harmony, are substituted for thoughts of failure, despair, lack, limitation and discord, and as these thoughts take root, the physical tissue is changed and the individual sees life in a new light, old things have actually passed away, all things have become new, he is born again, this time born of the spirit, life has a new meaning for him, he is reconstructed and is filled with joy, confidence, hope, energy. He sees opportunities for success to which he was heretofore blind. He recognizes possibilities which before had no meaning for him.

The thoughts of success with which he has been impregnated are radiated to those around him, and they in turn help him onward and upward; he attract to him new and successful associates, and this in turn changes his environment; so that by this simple exercise of thought, a man changes not only himself, but his environment, circumstances and conditions.

You will see, you must see, that we are at the dawn of a new day; that the possibilities are so wonderful, so fascinating, so limitless as to be almost bewildering. A century ago any man with a Gatling Gun could have annihilated a whole army equipped with the implements of warfare then in use. So it is at present.

Any man with a knowledge of the possibilities contained in "The Master Key To Riches" has an inconceivable advantage over the multitude.

PART SIX - THE MASTER KEY TO RICHES

PART SIX

It is my privilege to enclose Part Six. This part will give you an excellent understanding of the most wonderful piece of mechanism which has ever been created. A mechanism whereby you may create for yourself Health, Strength, Success, Prosperity or any other condition which you desire.

Necessities are demands, and demands create action, and actions bring about results. The process of evolution is constantly building our tomorrows out of our todays. Individual development, like Universal development, must be gradual with an ever-increasing capacity and volume.

The knowledge that if we infringe upon the rights of others, we become moral thorns and find ourselves entangled at every turn of the road, should be an indication that success is contingent upon the highest moral ideal, which is "The greatest good to the greatest number." Aspiration, desire and harmonious relations constantly and persistently maintained will accomplish results. The greatest hindrance is erroneous and fixed ideas.

To be in tune with eternal truth we must possess poise and harmony within. In order to receive intelligence the receiver must be in tune with the transmitter.

Thought is a product of Mind and Mind is creative, but this does not mean that the Universal will change its modus operandi to suit us or our ideas, but it does mean that we can come into harmonious relationship with the Universal, and when we have accomplished this we may ask anything to which we are entitled, and the way will be made plain.

PART SIX

1. The Universal Mind is so wonderful that it is difficult to understand its utilitarian powers and possibilities and its unlimited producing effects.

2. We have found that this Mind is not only all intelligence but all substance. How, then, is it to be differentiated in form? How are we to secure the effect which we desire?

3. Ask any electrician what the effect of electricity will be and he will reply that "Electricity is a form of motion and its effect will depend upon the mechanism to which it is attached." Upon this mechanism will depend whether we shall have heat, light, power, music or any of the other marvelous demonstration of power to which this vital energy has been harnessed.

4. What effect can be produced by thought? The reply is that thought is mind in motion (just as wind is air in motion), and its effect will depend entirely on the "mechanism to which it is attached."

5. Here, then, is the secret of all mental power; it depends entirely on the mechanism which we attach.

6. What is this mechanism? You know something of the mechanism which has been invented by Edison, Bell, Marconi and other electrical wizards, by which place and space and time have become only figures of speech, but did you ever stop to think that the mechanism which has been given you for transforming the Universal, Omnipresent Potential Power was invented by a greater inventor than Edison?

7. We are accustomed to examining the mechanism of the implements which we use for tilling the soil, and we try to get an understanding of the mechanism of the automobile which we drive, but most of us are content to remain in absolute ignorance of the greatest piece of mechanism which as ever come into existence, the brain of man.

8. Let us examine the wonders of this mechanism; perhaps we shall thereby get a better understanding of the various effects of which it is the cause.

9. In the first place, there is the great mental world in which we live and move and have our being; this world is omnipotent, omniscient and omnipresent; it will respond to our desire in direct ratio to our purpose and faith; the purpose must be in accordance with the law of our being, that is, it must be creative or constructive; our faith must be strong enough to generate a current of sufficient

strength to bring our purpose into manifestation. "As thy faith is, so be it unto thee," bears the stamp of scientific test.

10. The effects which are produced in the world without are the result of the action and reaction of the individual upon the universal; that is the process which we call thinking; the brain is the organ through which this process is accomplished; think of the wonder of it all! Do you love music, flowers, literature, or are you inspired by the thought of ancient or modern genius? Remember, every beauty to which you respond must have its corresponding outline in your brain before you can appreciate it.

11. There is not a single virtue or principle in the storehouse of nature which the brain cannot express. The brain is an embryonic world, ready to develop at any time as necessity may arise. If you can comprehend that this is a scientific truth and one of the wonderful laws of nature, it will be easier for you to get an understanding of the mechanism by which these extraordinary results are being accomplished.

12. The nervous system has been compared to an electric circuit with its battery of cells in which force is originated, and its white matter to insulated wires by which the current is conveyed; it is through these channels that every impulse or desire is carried through the mechanism.

13. The spinal cord is the great motor and sensory pathway by which messages are conveyed to and from the brain; then, there is the blood supply plunging through the veins and arteries, renewing our energy and strength, the perfectly arranged structure upon which the entire physical body rests, and, finally, the delicate and beautiful skin, clothing the entire mechanism is a mantle of beauty.

14. This then is the "Temple of the living God" and the individual "I" is given control and upon his understanding of the mechanism which is within his control will the result depend.

15. Every thought sets the brain cells in action; at first the substance upon which the thought is directed fails to respond, but if the thought is sufficiently refined and concentrated, the substance finally yields and expresses perfectly.

16. This influence of the mind can be exerted upon any part of the body, causing the elimination of any undesirable effect.

17. A perfect conception and understanding of the laws governing in the mental world cannot fail to be of inestimable value in the transaction of business, as it develops the power of discernment and gives a clearer understanding and appreciation of facts.

18. The man who looks within instead of without cannot fail to make use of the mighty forces which will eventually determine his course in life and so bring him into vibration with all that is best, strongest and most desirable.

19. Attention or concentration is probably; the most important essential in the development of mind culture. The possibilities of attention when properly directed are so startling that they would hardly appear credible to the uninitiated. The cultivation of attention is the distinguishing characteristic of every successful man or woman, and is the very highest personal accomplishment which can be acquired.

20. The power of attention can be more readily understood by comparing it with a magnifying glass in which the rays of sunlight are focused; they possess no particular strength as long as the glass is moved about and the rays directed from one place to another; but let the glass be held perfectly still and let the rays be focused on one spot for any length of time, the effect will become immediately apparent.

21. So with the power of thought; let power be dissipated by scattering the thought from one object to another, and no result is apparent; but focus this power through attention or concentration on any single purpose for any length of time and nothing becomes impossible.

22. A very simple remedy for a very complex situation, some will say. All right, try it, you who have had no experience in concentrating the thought on a definite purpose or object. Choose any single object and concentrate your attention on it for a definite purpose for even ten minutes; you cannot do it; the mind will wander a dozen times and it will be necessary to bring it back to the original purpose, and each time the effect will have been lost and at the end of the ten minutes nothing will have been gained, because you have not been able to hold your thought steadily to the purpose.

23. It is, however, through attention that you will finally be able to overcome obstacles of any kind that appear in your path onward and upward, and the only way to acquire this wonderful power is by practice -- practice makes perfect, in this as in anything else.

24. In order to cultivate the power of attention, bring a photograph with you to the same seat in the same room in the same position as heretofore. Examine it closely at least ten minutes, note the expression of the eyes, the form of the features, the clothing, the way the hair is arranged; in fact, note every detail shown on the photograph carefully. Now cover it and close your eyes and try to see it mentally; if you can see every detail perfectly and can form a good mental image of the photograph, you are to be congratulated; if not, repeat the process until you can.

25. This step is simply for the purpose of preparing the soil; next week we shall be ready to sow the seed.

26. It is by such exercises as these that you will finally be able to control your mental moods, your attitude, your consciousness.

27. Great financiers are learning to withdraw from the multitude more and more, that they may have more time for planning, thinking and generating the right mental moods.

28. Successful businessmen are constantly demonstrating the fact that it pays to keep in touch with the thought of other successful businessmen.

29. A single idea may be worth millions of dollars, and these ideas can only come to those who are receptive, who are prepared to receive them, who are in successful frame of mind.

30. Men are learning to place themselves in harmony with the Universal Mind; they are learning the unity of all things; they are learning the basic methods and principles of thinking, and this is changing conditions and multiplying results.

31. They are finding that circumstances and environment follow the trend of mental and spiritual progress; they find that growth follows knowledge; action follows inspiration; opportunity follows perception; always the spiritual first, then the transformation into the infinite and illimitable possibilities of achievement.

32. As the individual is but the channel for the differentiation of the Universal, these possibilities are necessarily inexhaustible.

33. Thought is the process by which we may absorb the Spirit of Power, and hold the result in our inner consciousness until it becomes a part of our ordinary consciousness. The method of accomplishing this result by the persistent practice of a few fundamental principles, as explained in this System, is "The Master Key To Riches" which unlocks the storehouse of Universal Truth.

34. The two great sources of human suffering at present are bodily disease and mental anxiety. These may be readily traced to the infringement of some Natural Law. This is, no doubt, owing to the fact that so far knowledge has largely remained partial, but the clouds of darkness which have accumulated through long ages are beginning to roll away and with them many of the miseries that attend imperfect information.

"That a man can change himself, improve himself, re-create himself, control his environment, and master his own destiny is the conclusion of every mind who is wide-awake to the power of right thought in constructive action."

Study Questions with Answers - Part Six

51. What are some of the effects which can be produced by electricity?

Heat, light, power, music.

52. Upon what do these various effects depend?

Upon the mechanism to which electricity is attached.

53. What is the result of the action and interaction of the individual mind upon the Universal?

The conditions and experiences with which we meet.

54. How may these conditions be changed?

By changing the mechanism by which the Universal is differentiated in form.

55. What is this mechanism?

The brain.

56. How may it be changed?

By the process we call thinking. Thoughts produce brain cells, and these cells respond to the corresponding thought in the Universal.

57. *Of what value is the power of concentration?*

It is the very highest personal accomplishment which can be acquired, and the distinguishing characteristic of every successful man or woman.

58. *How may it be acquired?*

By faithfully practicing the exercises in this System.

59. *Why is this so important?*

Because it will enable us to control our thoughts, and since thoughts are causes conditions must be effects; if we can control the cause we can also control the effect.

60. *What is changing conditions and multiplying results in the objective world?*

Men are learning the basic methods of constructive thinking.
